

BOOKLETMAKING KASFOLD SPRINT 3000

The British manufactured Kasfold Sprint 3000 booklet maker is specifically designed to meet the requirements of the digital print market (whilst remaining 100% Litho friendly), producing the highest quality booklet without marking the cover or inside sheets. It has many innovative design concepts providing a reasonably priced solution to short-run booklet production in digital printshops

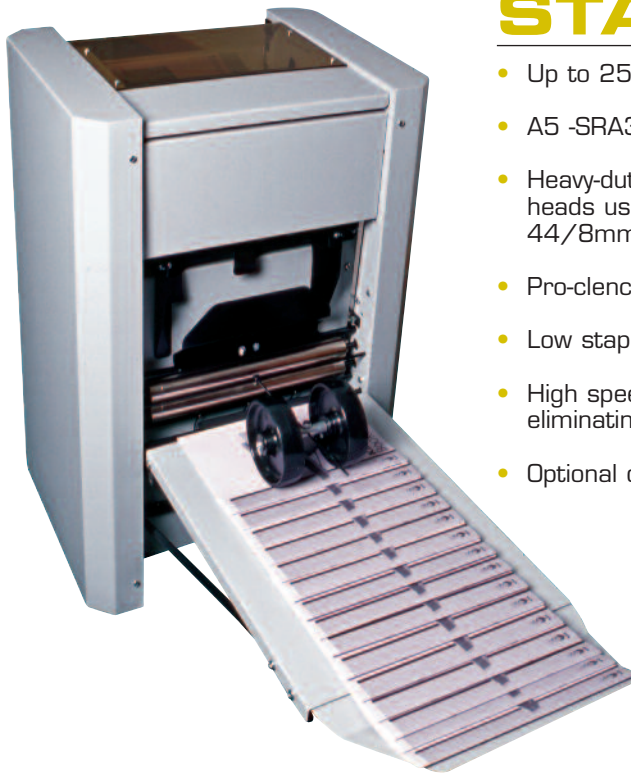

BOOKLETMAKING KASFOLD SPRINT 3000

Using the automatic Kasfold is simplicity in itself, a collated set of up to 25 sheets plus card cover is fed into the the booklet maker, a photocell starts the booklet making cycle, leaving the operator both hands free for loading the next set.

The set is jogged from both sides, centre stapled, folded and front edge trimmed if required. A high-capacity stacker conveyer delivers the finished booklets. The optional TR2 On-line trimmer attachment saves hours of wasted time trimming booklets on a

conventional guillotine. Each Booklet is individually clamped and this scissor-action knife trims each booklet perfectly. The trimmer can be added to any kasfold at a later date, as budget allows.

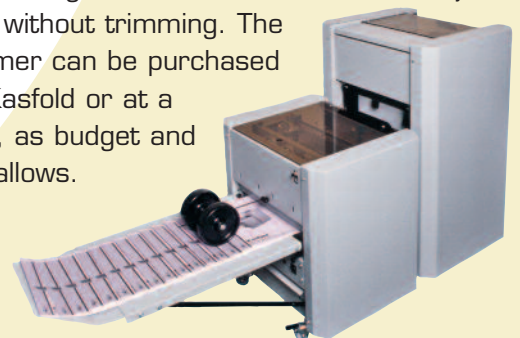

STANDARD FEATURES

- Up to 25 sheets + cover (100pp)
- A5 -SRA3 sheets sizes
- Heavy-duty 44 gauge staple heads using 44/6mm and 44/8mm staples
- Pro-clench flat clenched staple finish
- Low staple warning system
- High speed fold knife system, eliminating marking
- Optional on-line single knife trimmer
- Compact design needing only 46 x 61 cm when stored
- Quiet operation
- Floor standing
- High capacity conveyer, stacks even the heaviest of books and folds away for easy storage when not in use
- CD (120 x 120mm) booklet production
- Loop stapling modification available as an option

TR2 ON-LINE FRONT EDGE TRIMMER

The TR2 Trimmer attachment is designed to work on-line to all Kasfold 2000/3000/5000 Bookletmakers. The optional trimmer attachment saves hours of wasted time trimming booklets 5 or 10 at a time on a conventional guillotine (with the inevitable variations on each book).

With the TR2 Trimmer, stapled and folded booklets enter individually, where they are securely clamped and precisely trimmed by the scissor action knife. The cutting action can be turned off if a job is needed without trimming. The TR2 Trimmer can be purchased with the Kasfold or at a later date, as budget and workload allows.

KASFOLD SPRINT 3000 Bookletmaker/Trimmer

Length	<i>Conveyor Folded</i>	49 cm
